

iMpowering the future workforce

In June 2019, International Minerals Innovation Institute (“IMII”) launched a scholarship initiative designed to encourage and support women and Indigenous students pursuing a career in Saskatchewan’s minerals industry.

The five-year initiative commits over \$500,000 to establish two scholarship programs: **iMpowered** and the **Mining Futures Award**.

Candidates eligible for the awards are:

- **iMpowered** – College, polytechnic and/or university women and Indigenous students with financial responsibilities for the family, enrolled in a science, technology, engineering, mathematics or computer science program and interested in a career in the minerals industry.
- **Mining Futures Award** – Undergraduate students currently enrolled in one of three Mining Engineering Options at the University of Saskatchewan.

Proponent: IMII

Project Duration: June 2019 to December 2023

Project Cost: \$510,000

IMII Contribution: \$510,000

**INTERNATIONAL
MINERALS INNOVATION
INSTITUTE**

IMII is a unique innovation supporting network of mining companies, government departments and agencies, and post-secondary and research institutions, jointly funded by industry and government. It exists to deliver innovations that matter to mining in Saskatchewan.
